**Statement of Flame
Resistance Compliance**

I have applied for a fire safety permit to use a commercial cooking appliance under a canopy where there is no public access. I currently do not possess a certificate of flame resistance for the canopy or canopies under which food cooking and preparation will take place.

By signing this statement, I attest to the fact that my canopy or canopies do possess a visible certificate of flame resistance which was applied by the manufacturer at time of production and attached at the time of my purchase.

I understand that if the visible certificate of flame resistance is inadequate, or if the canopy has a warning against the use of heat producing appliances attached, I will not be permitted to use cooking or heat producing appliances beneath the canopy. Use of the cooking or heat producing appliances will be limited to an area five feet from mine and adjacent canopies, twenty feet from tents.
